

Fujikura Composite CSR Procurement Basic Policy

Under our management philosophy of "valuing technological expertise, creativity, and proactive communication to enhance the quality of life and foster a sense of safety for everyone in society," we strive to deliver safe, secure, and high-quality products and services to our customers. To achieve this, we conduct fair and equitable transactions while promoting procurement activities that consider social responsibility, such as human rights, labor standards, and environmental impact, together with our supply chain partners.

1. Compliance with Laws and Respect for International Conduct Standards

We comply with the laws of each country and promote fair and equitable procurement activities while respecting international conduct standards. Procurement activities are conducted in accordance with the "Environmental, Occupational Health, and Safety Policy," with consideration for global environmental impact.

2. Consideration for Human Rights, Labor, and Occupational Health and Safety

We respect fundamental human rights and diverse values, eliminating all forms of discrimination and conducting procurement activities with attention to labor conditions and occupational health and safety.

3. Ensuring Quality and Safety

Procurement activities are carried out in accordance with the "Quality Policy," aiming to secure high levels of quality and safety based on optimal standards of quality, cost, and supply.

4. Consideration for the Global Environment

Procurement activities are conducted in accordance with the "Environmental, Occupational Health, and Safety Policy," with a focus on environmental responsibility.

5. Maintaining Information Security

Confidential information and personal data related to procurement transactions are strictly managed.

6. Coexistence with Society

We promote initiatives that contribute to society and foster coexistence with the community.
