

High Performance Sheetfed Blanket

FS-60 OVERVIEW

Outstanding Sharp Dot Reproduction & Solid Density

Using new low-sink carcass and a thinner compressible layer, the FS-60 provides a very sharp dot reproduction, better solid density, high level durability and high resistance to edge marking on several paper & metal. The construction of the compressible layer is thinner than our other sheetfed products which in turn make the blanket print very sharp dot.

PRODUCT FEATURES

- Superior dot reproduction and solid density
- High resistance to ink staining and paper-edge marking
- Excellent ink transfer and sheet release
- Easy to increase printing pressure
- Impact-resistance compressible layer for rapid smash recovery

TECHNICAL SPECS

Type	Sheetfed
Nominal Thickness	1.70mm / 1.96mm
Color	Blue
Roughness	7.0 μ m
Hardness	82 Shore A
