

▶ High Performance Sheetfed Blanket

▶ UV GREEN OVERVIEW

Strong Surface & Higher Solid Density

UV GREEN is designed with an EPDM rubber surface that protects the blankets integrity from swelling or having issues with image retention, which are sometimes caused by UV ink, chemicals or coatings. The surface was manufactured with a medium grind finish so that the blanket maintains excellent ink and paper release with higher solid density.

▶ PRODUCT FEATURES

- Strong against surface abrasion and paper edge marking
- Less swelling against Metaric inks
- Good compatibility with HUV and LED UV inks

▶ TECHNICAL SPECS

Type	Sheetfed
Nominal Thickness	1.96mm
Color	Green
Roughness	5.0 μm
Hardness	82 Shore A
